Personal objectives

Looking for offering to a company my knowledge in computer engineering, in developing a project within a team in an international context.
Interested in software on mobile, Internet and global applications.

Education

2004-2007: ECE, Ecole Centrale d'Electronique (Paris)

Computer science engineering school (5 years cycle)

Four years (after the baccalaureate)

A Quarter at Staffordshire University (United Kingdom)

Specialized in Information systems and networks

Professional Experience

- July-august 2007** Writing the specification of an information system for a specific activity of the group "**Imprimerie Nationale**". Up-front design and writing of technical and functional architecture documents. *Several months project*
- April 2007** President of **iTeam**, a Linux oriented nonprofit organization (<http://www.iteam.org>) that provides servers and network services to students of the engineering school ECE.
Since 2004: Network Administrator, creation of the association website, various applications and scripts. Maintenance of servers and Databases.
PHP, MySQL, LDAP, Apache, Debian, OpenBSD, bash, UNIX firewall
- June-July 2006** Creation and development of an Intranet for the process center of **ChronoServices** (smart cards for trucks).
Authorized to work in highly secure computers centers.
Several months project - PHP, MySQL and framework: CakePHP
- Since 2006** Creation of websites for small businesses: Ardis.eu.com, Trans-z.com.
LAMP platforms – Content Management Frameworks: SPIP, Joomla, ModX.
- December 2005** Creation and development of a ticket checking application for ECE school events. Ticket list import, barcode checking, statistics and server installation and management.
PHP, MySQL, Debian.

General Information

Languages

English (fluent), French (native), and German (basic).

Three months in UK, one month in USA.

Driving license

Hobbies

Computer sciences (free software and OS).

Music: 10 years of oboe and saxophone.

Visual arts.

Personal website: <http://webplay.fr/>

Computer sciences

Computing

Good general culture in data processing, easy adaptation and intellectual curiosity.

Development

Java, C/C++, Python, UNIX scripts, ASM, Visual Basic.

Web: PHP, XHTML, JavaScript and CSS, databases, Ruby on rails.

Software

Skilled: Office, open source software suites. Adobe suite for graphics creations.

Os: Linux, Solaris, Mac OS and Windows.
